**RE: Maine Pollutant Discharge Elimination System Permit #MEU507690  
Maine Waste Discharge License (WDL) #W007690-5J-H-R  
Termination of Permit**

Dear Mr. Behling:

By this letter, the Department of Environmental Protection (Department) is terminating the above referenced renewal permit last issued on December 14, 2018 (with subsequent modification and minor revisions).

The permit authorized the discharge of 4,000 gallons per day of treated sanitary wastewater to a 1.48 acre spray irrigation site.

Based on an email communication from you to Pam Parker dated October 13, 2022, and an email from Kayleigh Burda to Melanie Loyzim dated November 21, 2021, you are requesting to terminate said WDL as Hermon MHP LLC has permanently discontinued their wastewater treatment lagoon and replaced it with a subsurface treatment system.

The Department will be inactivating the facility in our database so that Discharge Monitoring Reports and billing statements are not sent to the licensee in the future. By copy of this letter, we are notifying the U.S. Environmental Protection Agency of the retirement of the license.

Please be advised that a license may be needed from Department for any future discharge of pollutants from this facility to the surface or ground waters of the State of Maine, either under current ownership or new ownership. Any new permit/license would be based on the characteristics of the effluent being discharged and the impacts of the discharge on the quality of the receiving water.

Sincerely,

Cindy L. Dionne  
Division of Water Quality Management  
Bureau of Water Quality
