# UNITED STATES ENVIRONMENTAL PROTECTION AGENCY NEW ENGLAND - REGION I 5 POST OFFICE SQUARE, SUITE 100 BOSTON, MASSACHUSETTS 02109-3912

Request for General Permit Authorization to Discharge Wastewater (Notice of Intent (NOI) to be covered by the General Permit)

Hydroelectric Generating Facilities (HYDROGP) NPDES General Permits No. MAG360000 and NHG360000

A. Facility Information	
1. Indicate applicable General Permit for dischar	rge: MAG360000 X
	NHG360000
2. Facility Name, Location, and Data:  Name NAFA Entry Massachus Street/POBox 25 Gardins Falls Roa State Massachus Sells Latitude 42 35 29"  Type of Business SIC Code(s) 49//	setts LLC - Gardners Palls Station d City Buckland Zip Code 01338 Longitude 72° 43'51" ic gene varting facility
3. Facility Mailing Address (if different from Low Name NATA Every Massachuse Street/PO Box 15 Agawam Aven State Massachusetts	we City West Springfield
4. Facility Owner:  Name NATA Energy Mussichusetts  Street/PO Box 15 Affawa w Aven  State Massachusetts  Contact Person Alan Daglass  Owner is (check one): 1. Federal 2. State	Zip Code 01087  Telephone Number 4/3 730 475/
Other (Describe)	3. 1110ai 4. 111vate
State_	e-mail (optional)  City  Zip Code  Telephone Number
b. Is the facility covered by an individual NPDES	al permit coverage) been granted for the discharge that is listed on
If Yes, Permit Number <b>WIN 0035670</b> c. Is there a pending NPDES application on file w	with EPA for this discharge? Yes No No If Yes, date

7. Attach a topographic map indicating the location of the facility and the outfall(s) to the receiving water. Map attached?
8. Provide the number of turbines and the combined turbine discharge (installed capacity) at maximum and minimum output, in cubic feet per second (cfs). Number of turbines 4 Combined turbine discharge (installed capacity): maximum output, cfs 1420 and minimum output, cfs 80
9. Is the hydroelectric generating facility operated as a pump storage project? <b>No</b>
B. Discharge Information (attach additional sheets as needed).
1. Name of receiving water into which discharge will occur: Deerfield River  Freshwater: Marine Water:
2. Attach a line drawing or flow schematic showing water flow through the facility including sources of intake water, operations contributing flow, treatment units, outfalls, and receiving waters(s). Line drawing or flow schematic attached?
3. List each outfall under the following categories and number sequentially: equipment-related cooling water; equipment and floor drain water; maintenance-related water; facility maintenance-related water during flood/hig water events, and equipment-related backwash strainer water (see Parts I.A.1, 2, 3, and 4; or Parts I.B.1, 2, 3, and 4). Attach additional sheets to identify outfalls as needed.
Equipment-related cooling water Equipment and floor drain water
See Attached Line Drawings
Maintenance-related water  Facility maintenance-related water during flood/high water events
See Attached Line Drawings
Equipment-related backwash strainer water
See Attached Line Drawings
4. List each outfall discharging any combination of the following to identify the combined discharges: equipment

strainer water, and facility maintenance-related water during flood/high water events (see Parts I.A.5 and B.5) and continue the sequential numbering. Attach additional sheets to identify outfalls as needed.

NOI Information - NPDES Hydroelectric Facilities General Permit

Page 4/6

related cooling water, equipment and floor drain water, maintenance-related water, equipment-related backwash

- 5. Provide for each outfall the following:
- a. Latitude and longitude to the nearest second (see EPA's siting tool at: http://www.epa.gov/tri/report/siting\_tool/) and the name(s) of the receiving water(s) into which the discharge will occur.

  42° 35′ 22″, -72° 43′ 35″, Deer field River

  b. The operations contributing flow and the treatment received by the discharge. Indicate the average flow from
- each operation. See Attached Line Drawings
- c. Indicate if the discharge can be sampled at least once per year or can be sampled using the representative outfall sampling provisions (see Parts I.A.6 or B.6 and III.E).
- d. Note if the outfall discharges intermittently or seasonally.

See Attached Line Drawings

#### C. Chemical Additives

Are any non-toxic neutralization chemicals used in the discharge(s)? Yes \_\_\_\_\_ No\_X If so, include the chemical name and manufacturer; maximum and average daily quantity used on a monthly basis as well as the maximum and average daily expected concentrations (mg/l) in the discharge, and the vendor's reported aquatic toxicity (NOAEL and/or LC50 in percent for typically acceptable aquatic organism).

# D. Endangered Species Act Eligibility Information

A facility, with a previous ESA Section 7 consultation with the National Marine Fisheries Service (NMFS), seeking coverage under the Massachusetts general permit and discharging to the Connecticut River or Merrimack River should provide one of the following, if available.

- 1. A formal certification indicating consultation with the National Marine Fisheries Service (NMFS) resulted in either a no jeopardy opinion or a written concurrence on a finding that the discharges are not likely to adversely affect the shortnose sturgeon or critical habitat. Information should also be provided indicating the hydroelectric facility's previous ESA Section 7 consultation with NMFS covered the discharges to be authorized under this general permit and demonstrating no significant changes in the discharges have occurred since the previous consultation.
- 2. Another operator's certificate of the ESA eligibility for those discharges to be authorized under this general permit.

### E. Supplemental Information

Please provide any supplemental information, including antidegradation review information applicable to new or increased discharges. Attach any certification(s) required by the general permit.

## F. Signature Requirements

The Notice of Intent must be signed by the operator in accordance with the signatory requirements of 40 CFR Section 122.22 (see below) including the following certification:

I certify under penalty of law that no chemical additives are used in the discharges to be authorized under this general permit except for those used for pH adjustment and (2) this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted.

Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, I certify that the information submitted is, to the best of my knowledge and belief, true, accurate, and complete. I certify that I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations.
