

Carbon Monoxide Alarms

Protect Your Family and Yourself

Place CO alarms:

1

In a central location on every level of the home's livable space (including the basement) and at least 15 feet away from any fuel-burning appliance.

2

Near or inside each sleeping area in the home.

3

Inside the home near the door leading to the attached garage and in rooms over the garage.

REMINDERS

Test CO alarms monthly.

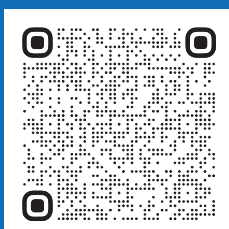

If possible, interconnect your CO alarms — when one sounds, they all sound.

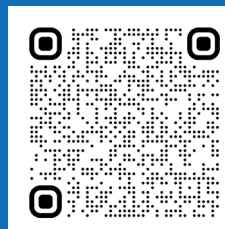

Follow manufacturer instructions and all applicable laws and building codes for CO alarm placement and replacement frequency/schedule.
