Part II. Self-Assessment

In the past the town has relied heavily on citizen volunteers to assist it in implementing and/or administering land development and environmental rules and regulations. In fact, a citizen volunteer prepared the Stormwater Management Plan submitted to the DEP and served as the Stormwater Administrator. (This individual has recently resigned her volunteer positions in Town.) As the town has grow over the past few years and with the reduction in state aid over the last few years, we have come to recognize the difficulty in effectively administering land development and environmental rules and regulations including the preparation of this annual report and completing the BMP Items for the first plan year with our limited citizen volunteer resources. Thus we have employed outside consultants to oversee the implementation of the plan and preparation of the annual reports. We anticipate that we will complete all the first year outstanding BMP Items in the second plan year, and start all and substantially complete all the second year items.
