Solid Waste Infrastructure for Recycling Grants
Political Subdivisions Fact Sheet
City of Shoreline, Washington

Selected Grant Recipient

Name: City of Shoreline
Project Title: Shoreline Reuse Center

EPA Information

Region: EPA Region 10

Grant Funding: $4,448,848

Highlights

- Diverts 673 tons of mixed material in the near term and 4,606 tons of mixed waste over 10 years
- Creates 8 new jobs
- Creates a retail space for salvaged building materials, tools, and supplies

The City of Shoreline will use grant funding to establish the Shoreline Reuse Center, a one-stop shop for residents and businesses seeking to responsibly acquire, donate, repair, and repurpose goods while inspiring innovative solutions to reduce waste. By co-locating a salvaged building supply collection and resale space, tool library, and a community bike shop with second-hand bike sales and repair services with space for local reuse and repair organizations to provide additional waste reduction services, the Shoreline Reuse Center will promote community access to and a culture of reuse and recycling. In doing so, the City of Shoreline will divert more than 670 tons of reusable materials that would otherwise become municipal solid waste over the course of the grant period.

SWIFR Grants for Political Subdivisions

The Save Our Seas 2.0 Act provides investments in recycling to support the implementation of the National Recycling Strategy and build a circular economy for all. This funding supports improvements to waste management systems and programs, allowing for more efficient resource use and less environmental impact from waste materials. The SWIFR grant funding can be used to establish or optimize collection and management of materials; fund infrastructure, technology, or other improvements to reduce contamination; enhance markets for recycled commodities; and increase the diversion, recycling rate, and quality of materials collected for municipal solid waste.
