

Solid Waste Infrastructure for Recycling Grants Tribes and Intertribal Consortia Fact Sheet **Miccosukee Corporation**

Selected Grant Recipient

Name: Miccosukee Corporation

Project Location: Miccosukee Reserved Area Florida

Project Title: Miccosukee Solid Waste Facility

EPA Information

Region: EPA Region 4

Grant Funding: \$1,500,000.00

The Miccosukee Tribe will upgrade its waste facility to expand recycling capacity and improve site safety and organization. The project will build a new central recycling pad and designated sorting stations and improve roads to allow for smoother traffic flow through the facility. This program promotes durable infrastructure that strengthens the Tribe's ability to manage recyclable materials as the community grows, ensuring the system remains organized, clear, and accessible for years to come.

Highlights

- Builds 11 roll-away dumpster bays with flexibility to accommodate future materials management needs.
- Creates construction jobs.
- Improves operational efficiency and safety for both workers and community members.

SWIFR Grants for Tribes and Intertribal Consortia

The Save Our Seas 2.0 Act provides investments in recycling to support the implementation of the National Recycling Strategy and build a circular economy for all. This funding supports improvements to waste management systems and programs, allowing for more efficient resource use and less environmental impact from waste materials. The SWIFR grant funding can be used to develop or update post-consumer materials management plans; establish or optimize collection and management of materials; fund infrastructure, technology, or other improvements to reduce contamination; enhance markets for recycled commodities; and increase the diversion, recycling rate, and quality of materials collected.
