RE: Maine Pollutant Discharge Elimination System Permit #MEU50827
Maine Waste Discharge License (WDL) #W008275-5S-A-N
Termination of Permit

Dear Mr. Douglas:

The Department of Environmental Protection (Department) is in receipt of a letter dated September 23, 2026, from you to the Department's compliance inspector, Galen Nickerson, requesting to terminate license #MEU50827. The Brunswick & Topsham Water District (BTWD) has constructed a new treatment plant and removed all piping and related appurtenances to the license. This was confirmed by Department staff during a site inspection on October 15, 2026, following the closure.

By this letter, the Department is terminating the above referenced license last issued on June 1, 2022, to the BTWD at the Jordan Avenue Water Treatment Facility. The permit authorized the discharge of 360,000 gallons per day of non-process, treated, raw (un-chlorinated) drinking well water via a surface discharge irrigation system to groundwater, Class GW-A in Brunswick.

The Department will be inactivating the facility in our database to ensure discharge monitoring reports and billing statements are not sent to the licensee in the future. By copy of this letter, we are notifying the U.S. Environmental Protection Agency of the retirement of the license.

Please be advised a license may be needed from the Department for any future discharge of pollutants from this facility to the surface or ground waters of the State of Maine. Any new permit/license would be based on the characteristics of the effluent being discharged and the impacts of the discharge on the quality of the receiving water.

If you have any questions regarding the matter, please feel free to contact me at laura.crossley@maine.gov or 207-615-6711.

Sincerely,

Laura Crossley
Division of Water Quality Management
